Mr. Zeev Miller
ICA Foundation Israel
2, Hagat st.
Omer 8496500

Dear Zeev,

Thank you very much for ICA Foundation's generous donation to the Spirit of Israel towards the establishment of the Educational Greenhouse in the Nitzana educational-eco community. The project will be implemented in order to widen and professionalize the activities of the community, in the field of agricultural training, development of advanced technologies and methods of cultivation, while strengthening the industry in the Ramat Negev region.

The Educational Greenhouse is now ready to begin and it will be dedicated to the Nitzana's agricultural studies program and for the use of the students of Nitzana's "Neveh Midbar" – world's first Bedouin youth village (boarding school). The greenhouse will be used to study and investigate various processes that occur in plants, such as: assimilation, growth rate, irrigation and fertigation, growth in a controlled environment, detached substrates and recycling, fertilization and multiplication. The greenhouse will also serve as a platform for thesis projects as part of an agricultural studies program and for ongoing high-level individual student's research projects.

At the Spirit of Israel we are committed to strengthening Israeli society by supporting educational and social programs and engaging the public in social activism.

We greatly appreciate the contribution of the ICA Foundation for strengthening the periphery communities in the Negev, and we thank you, Zeev, for your personal involvement and professional guidance.

On this occasion, we would like to wish you and your family a happy, a healthy and peaceful New Year.

Sincerely yours,

Joel Koschitzky

Chairman, Spirit of Israel
