Dear Zeev:

I wanted to personally thank you and your associates in visiting us at NIBN last week. I also wanted to apologize for being unable to attend due to prior commitments I made a number of weeks ago.

We hope you found the presentation of interest as well as the visit to some of the unique, state-of-the-art service laboratories offered by NIBN.

We are very keen in strengthening our affiliations to the Galil and Arava and thus are extremely interested to hear how you envisage our moving forward in terms of potential collaborative efforts and appropriate funding opportunities.

With kind regards,

Prof. Varda Shoshan-Barmatz  
Director, NIBN
