Gilat Research Center

Dear ICA,

I am thankful and honored to have received second prize for my poster in the Kenes HaNegev. It was an extremely satisfying end to a great conference. I hope that my contributions, however small, in the field of agriculture science will benefit the olive growers in the Negev region. As a young scientist, the financial assistance and validation of this prize means a lot, and encourage me to continue my research. I am sincerely thankful of the many opportunities allowed to me by ICA, and I hope that many future generations of young scientists receive the same warm encouragement that I have been given.

Sincerely,

Ian Michael Beiersdorf
