

**Wing Of Love**

A Garden of Love for People and Animals

4 April, 2016

Dear Ze'ev Miller

All the staff and boys at Wing of Love thank you and your Board whole-heartedly for the significant donation we received from ICA to support the start-up of our carpentry workshop.

The older boys work in the carpentry for the minimum wage and make a variety of wooden products, including garden furniture. Their work in the carpentry teaches them work skills that they will be able to use in their subsequent employment when they graduate from our framework and return to normative society.

We believe that every boy who has fallen by the wayside is entitled to help to find the right path back to becoming a good citizen. We therefore give him the opportunity to discover his talents, fulfil his potential, and learn how to integrate into society, while thinking of and helping others. You have been our partners in this important task and we are most grateful.

With warm regards,

Itamar Matias  
Chairman of the Board

Daniel Hirsch  
Director

"Train up a child in the way he should go; even when he is old he will not depart from it," Proverbs 22:6
